## PROFILE

---

Expert in production management: Creating workflow, optimize production pipeline and establishing content and task tracking routines using various project management tools.

Adept at working with various internal departments from the narrative, design, engineering, QA, content, marketing to legal and finance.

Experience in working with distributed remote teams and outsourcing vendors to reach production goals and keep the quality while staying on schedule and budget.

Capable of switching from macro to micro. Understanding strategic values and business dynamics of production, the how-to's to create high-level production plans, and hands-on requirements for day-to-day asset tracking, task management and project coordination.

Excellent interpersonal communication skills, highly motivated with a strong work ethic as well as the ability to work well under pressure.
